

Winemaker's Record Keeper

Why Are We Here

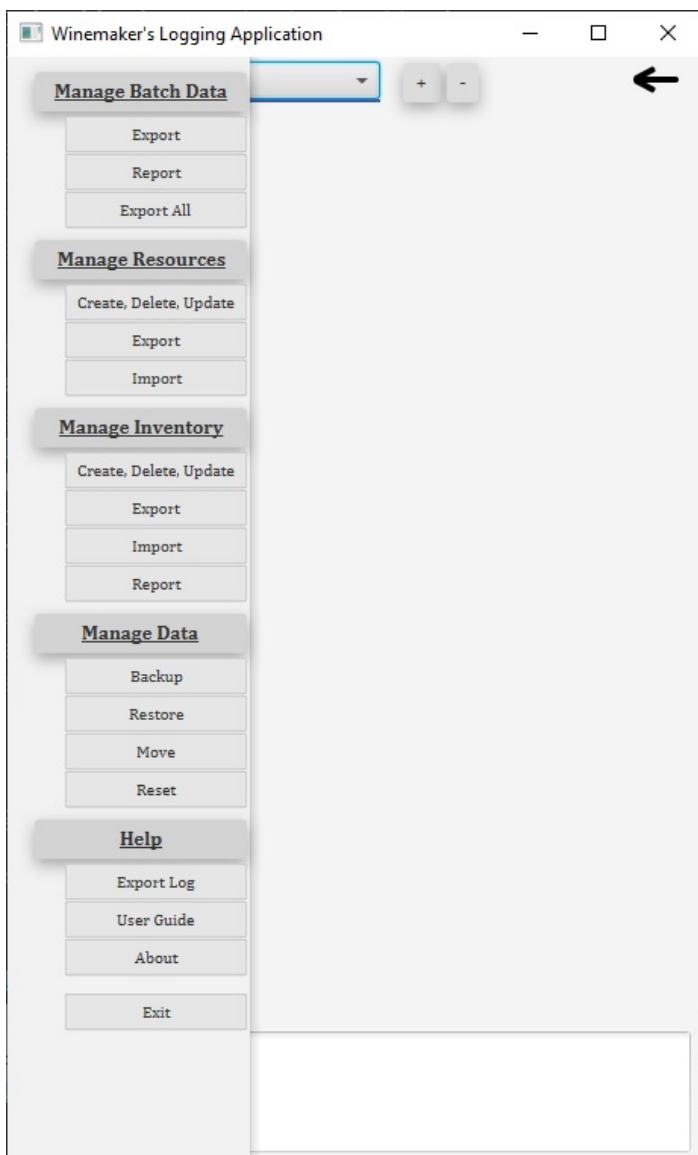

Winemaking benefits from consistent record-keeping. This application supports that effort by doing the following:

- Records the source, cost and amount of grapes used in a batch
- Logs fermentation activities such as crushing, fermenting, pressing and bottling
- Logs all test results

All data is exportable as a .CSV file and as a more readable text file.

Feature Summary

This is the menu of features, details will come later.

What the Application Stores

Examples of the information collected by the application.

Batch grapes were sourced from Lanza.
Batch contains 6 36-lb units, with a total weight of 216 lbs.
The cost was \$2.18 per lb, with a total cost of \$471.00
The batch was purchased from Consumers Produce

Containers in use:
FLX15G01

Summary of additives used in batch:
SO2: 108.87g
Filtered H2O: 200.00ml
LALLZYME EX Enzyme: 4.20g
Goferm Protect Yeast: 24.40g
Tartaric Acid: 6.40g
Fermaid O: 6.40g
Fermaid K: 24.00g

2025-10-03 Sangiovese

Batch grapes were sourced from Lanza.

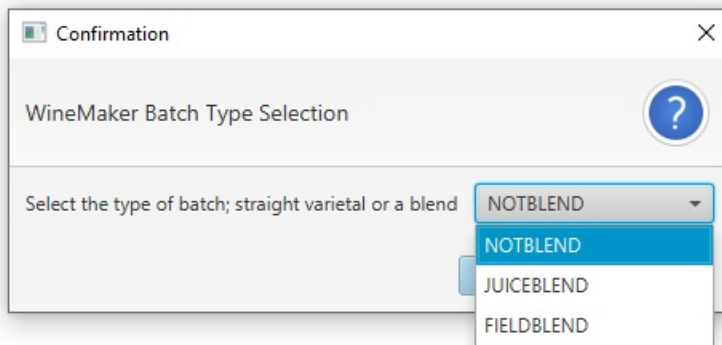

Batch contains 5 36-lb units, with a total weight of 180 lbs.

The cost was \$2.39 per lb, with a total cost of \$430.00

The batch was purchased from Consumers Produce

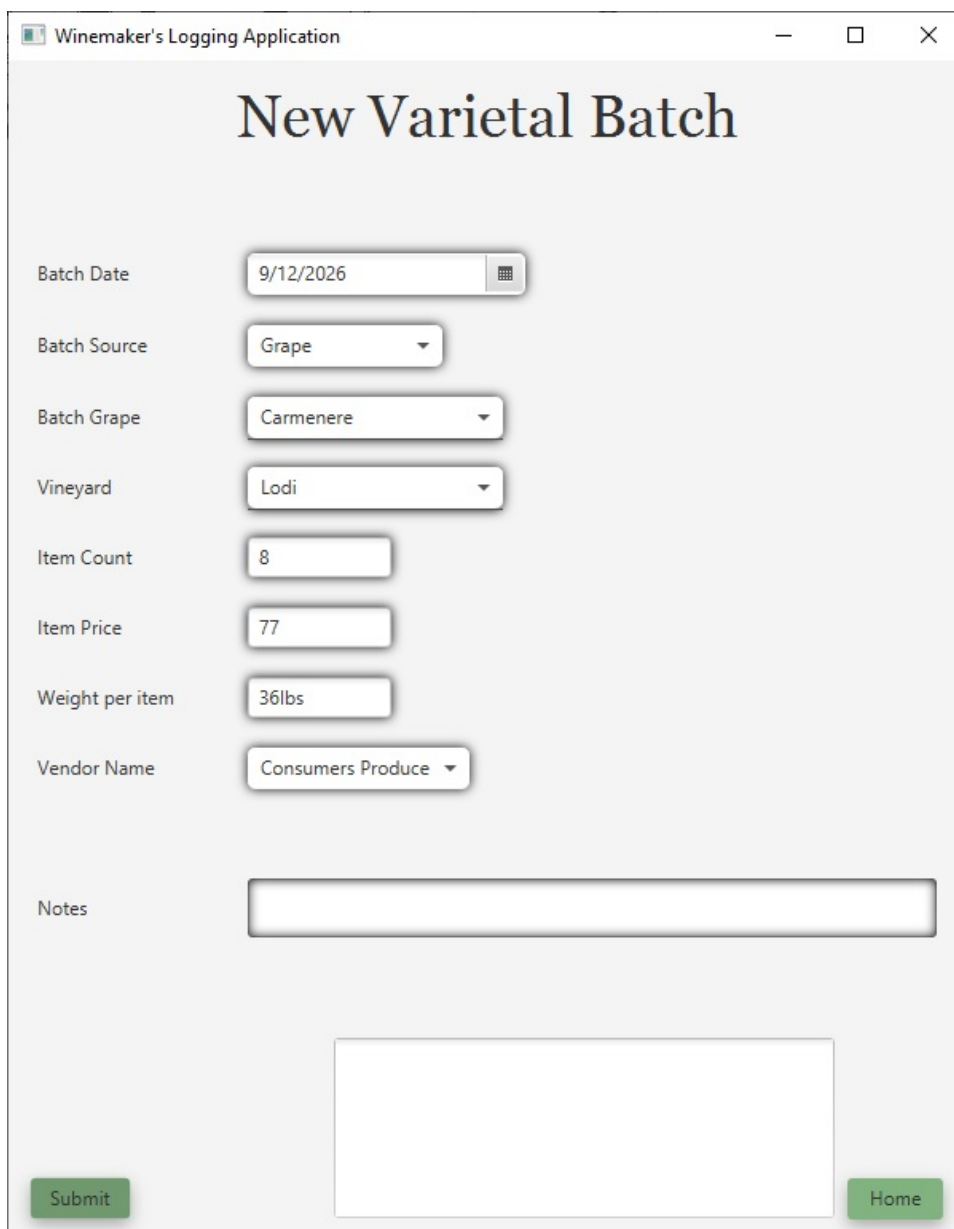

Batches

Batches come in 3 flavors: straight varietal, field blend, juice blend. The batch create button will prompt for the batch type:

A confirmation dialog box titled "Confirmation" with a close button (X) in the top right corner. The main title is "WineMaker Batch Type Selection" with a help icon (question mark in a circle) to its right. Below the title, the text reads "Select the type of batch; straight varietal or a blend". A dropdown menu is open, showing four options: "NOTBLEND" (highlighted in blue), "NOTBLEND", "JUICEBLEND", and "FIELDBLEND".

Single Varietal Batch: select a date and choose the various options, fill in the cost and amount fields, and click **Submit**:

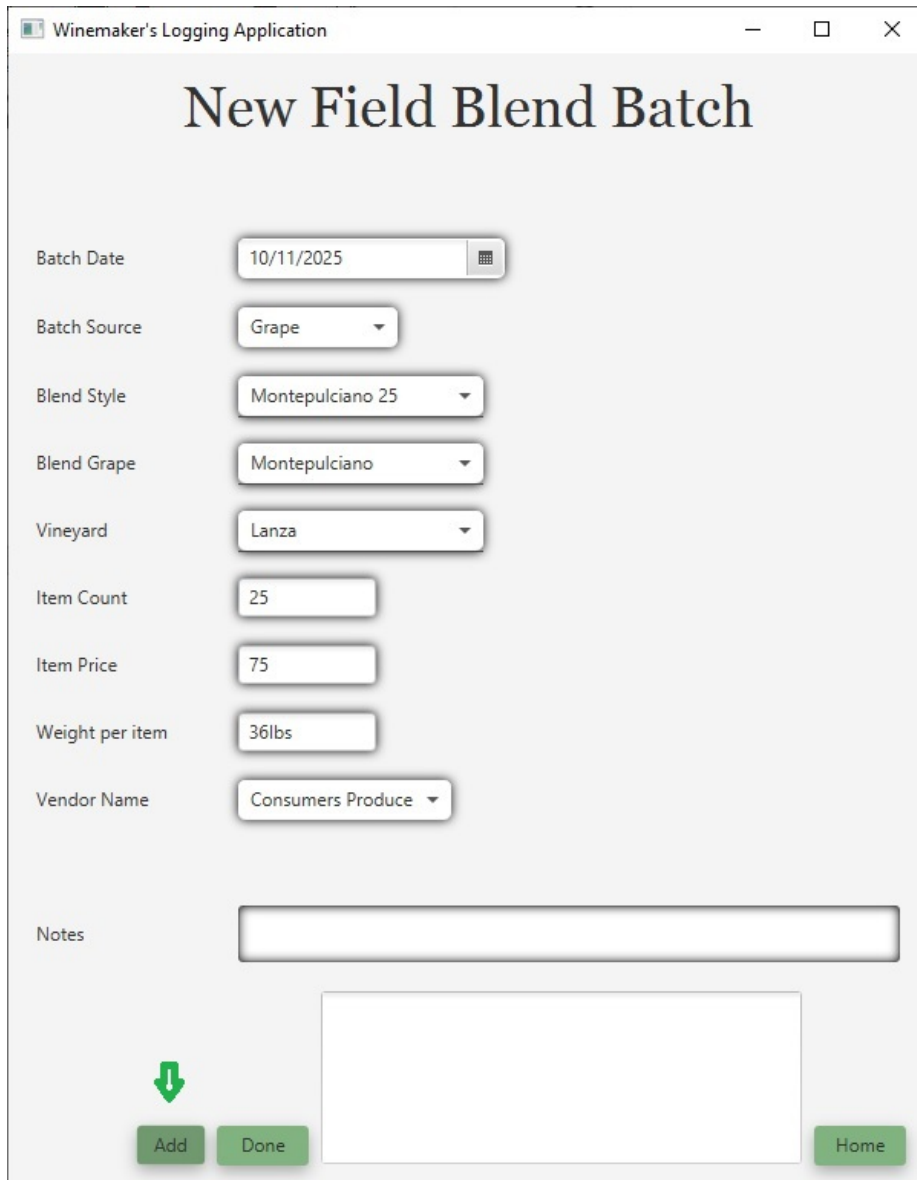

A screenshot of the "Winemaker's Logging Application" window. The title bar says "Winemaker's Logging Application" with standard window controls. The main heading is "New Varietal Batch". The form contains the following fields:

- Batch Date: 9/12/2026 (with a calendar icon)
- Batch Source: Grape (dropdown)
- Batch Grape: Carmenere (dropdown)
- Vineyard: Lodi (dropdown)
- Item Count: 8 (text input)
- Item Price: 77 (text input)
- Weight per item: 36lbs (text input)
- Vendor Name: Consumers Produce (dropdown)
- Notes: (empty text area)

At the bottom, there is a large empty text area, a "Submit" button on the left, and a "Home" button on the right.

Field Blend: select a blend name. Then select a component grape and click the **Add** button to add it to the batch. Repeat to add the other component grapes.

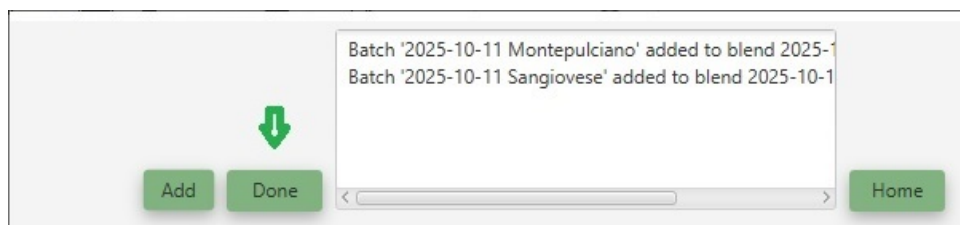

The image shows a web application window titled "Winemaker's Logging Application" with a "New Field Blend Batch" form. The form contains the following fields and controls:

- Batch Date:** A date input field showing "10/11/2025" with a calendar icon.
- Batch Source:** A dropdown menu with "Grape" selected.
- Blend Style:** A dropdown menu with "Montepulciano 25" selected.
- Blend Grape:** A dropdown menu with "Montepulciano" selected.
- Vineyard:** A dropdown menu with "Lanza" selected.
- Item Count:** A text input field with "25".
- Item Price:** A text input field with "75".
- Weight per item:** A text input field with "36lbs".
- Vendor Name:** A dropdown menu with "Consumers Produce" selected.
- Notes:** A large text area for notes.

At the bottom of the form, there are three buttons: "Add" (with a green downward arrow icon), "Done", and "Home".

After all blend grapes are added, click **Done**, then **Submit**.

This image shows a confirmation message box in the application. The message reads:

Batch '2025-10-11 Montepulciano' added to blend 2025-10-11
Batch '2025-10-11 Sangiovese' added to blend 2025-10-11

The message box is positioned over the "Add" and "Done" buttons. The "Done" button is highlighted with a green downward arrow icon. The "Home" button is also visible.

This image shows the "Submit" button in the application. The message box from the previous step is still visible, showing the same confirmation text:

Batch '2025-10-11 Montepulciano' added to blend 2025-10-11
Batch '2025-10-11 Sangiovese' added to blend 2025-10-11
All batches collected for blend set

The "Submit" button is highlighted with a green downward arrow icon. The "Home" button is also visible.

Back on the Home screen, displaying the batch shows the following:

2025-10-11 Montepulciano 25

Batch contains 30 36-lb units, with a total weight of 1080 lbs.
The cost was \$2.13 per lb, with a total cost of \$2304.90
The following grape is part of this blend:
Montepulciano
Batch Grapes were sourced from Lanza.
Batch contains 25 36-lb units, with a total weight of 900 lbs.
The cost was \$2.08 per lb, with a total cost of \$1875.00
The following grape is part of this blend:
Sangiovese
Batch Grapes were sourced from Lanza.
Batch contains 5 36-lb units, with a total weight of 180 lbs.
The cost was \$2.39 per lb, with a total cost of \$430.00

Juice Blend: the component batches must already exist and must have completed the fermentation stage. For a grape-based batch, there must be a completed Press task and a subsequent Checkpoint with the current batch volume. Select the blend name, then **Add** all required batches and the volume to be extracted, then **Done** to select the containers.

System Function Overview

The function menu is opened with the “Hamburger” icon:

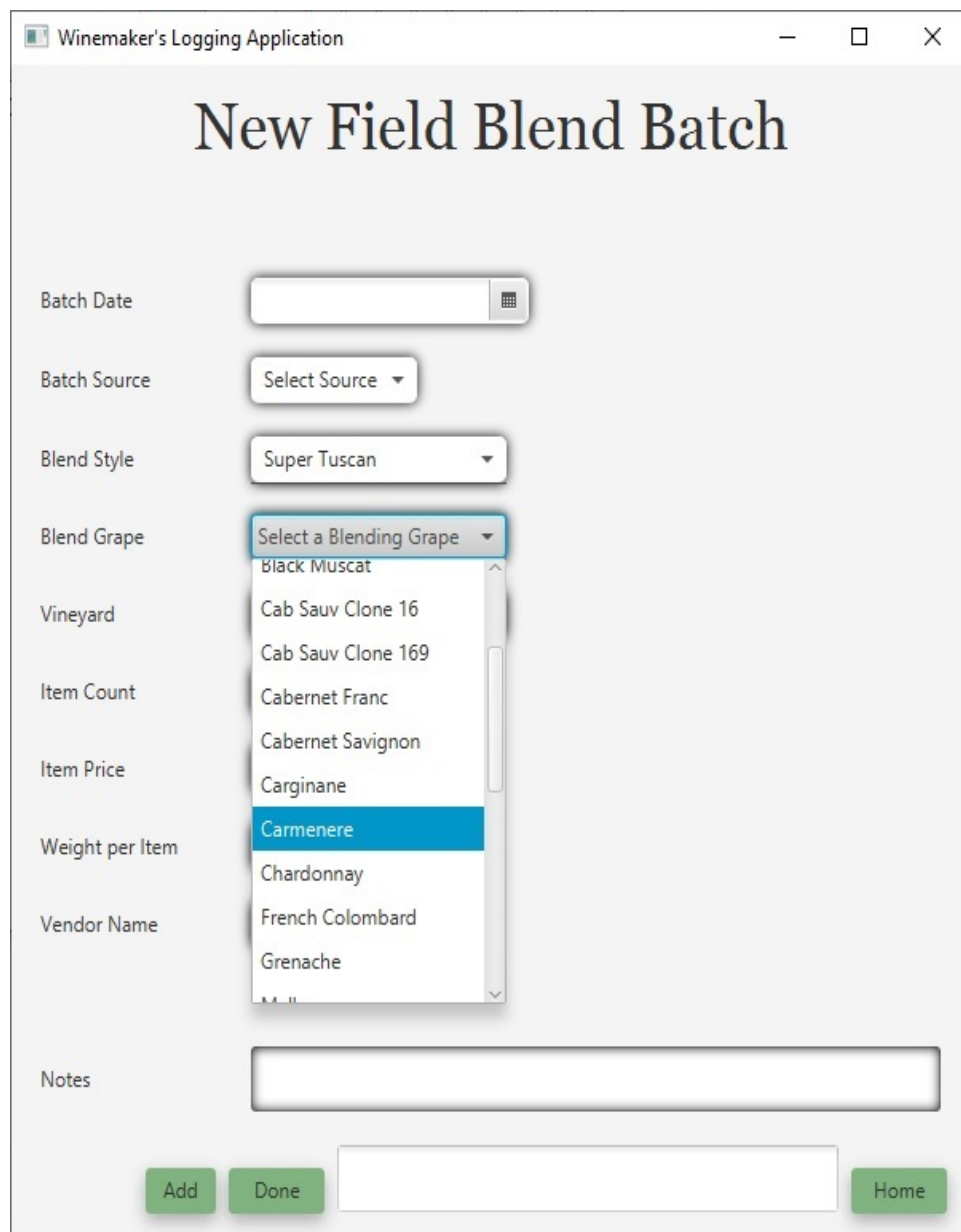

Function Summary

Most of these operations are self-explanatory, but a couple of them deserve a more detailed discussion: Resources and Inventory.

Resources

Throughout the application, various fields provide a list of options. For example, blend names, grape names and vineyard names for a new batch:

The screenshot shows a web application window titled "Winemaker's Logging Application". The main heading is "New Field Blend Batch". The form contains several input fields and a dropdown menu:

- Batch Date:** A text input field with a calendar icon.
- Batch Source:** A dropdown menu with the option "Select Source".
- Blend Style:** A dropdown menu with the option "Super Tuscan".
- Blend Grape:** A dropdown menu with the option "Select a Blending Grape". The dropdown is open, showing a list of grape varieties: Black Muscat, Cab Sauv Clone 16, Cab Sauv Clone 169, Cabernet Franc, Cabernet Sauvignon, Carginane, **Carmenere** (highlighted), Chardonnay, French Colombard, and Grenache.
- Vineyard:** A text input field.
- Item Count:** A text input field.
- Item Price:** A text input field.
- Weight per Item:** A text input field.
- Vendor Name:** A text input field.
- Notes:** A large text area.

At the bottom of the form, there are three buttons: "Add", "Done", and "Home".

For some resources like yeasts and additives, and especially for containers, an inventory entry can be created to reflect the physical instance of that resource. An entry for containers is required, but optional for everything else. The first example here shows a container entry. Notice the batch name associated with this container.

For additives and yeasts, the application will decrement the inventory's quantity on hand when they are used in various fermentation tasks. If no inventory entry exists, a warning is issued to that effect.

Referring to a previous example, the container reference is shown and the treatment of additives, with and without inventory entries.

The screenshot shows a web application window titled "Winemaker's Logging Application". The main heading is "Ferment Task - Amelioration". Below it, it says "For batch: 2024-09-27 Cabernet Franc". The form contains several input fields and dropdown menus:

- Task:** A dropdown menu with "Amelioration" selected.
- Task Date & Time:** A date field with "9/30/2025" and a time field with "'now' or (h:m am|pm)".
- Current Volume:** A text field with "5gal".
- Current Temperature:** A text field with "68F".
- Select Container:** A dropdown menu with "FLX15G01 (Eco Tank 15 gal)" selected.
- Select Additive & Amt:** Two rows. The first row has "Fermaid K" selected and "2g" entered. The second row has "LALLZYME MMX" selected and "4g" entered.
- Select Additive & Amt:** Four more rows, each with a "Select Additive" dropdown and an empty "Amt" field.
- Notes:** A text area with the placeholder "Notes".

At the bottom of the form are two buttons: "Submit" and "Home".

An "Error Alert" dialog box is overlaid on the form. It has a title bar "WineMaker Error Alert" and a close button. The main content area says "Error" and "Note: No inventory for LALLZYME MMX". There is a red "X" icon in a box. At the bottom right of the dialog is an "OK" button.

There is sufficient inventory for Fermaid but none for the MMX, so a warning is issued. Only a warning, it doesn't stop the submission.

Support and Help

This application is provided as-is. Feel free to contact the author with any questions or suggestions you might have, but keep your expectations low.

If the author responds, he may ask you to send in the debugging log.
